

CHEERS

CalCERTS Announces Shutdown

On July 22nd, CalCERTS notified the California Energy Commission (CEC) that it will no longer accept project registrations. Important dates:

- **August 2nd 2024** – CalCERTS registry will stop processing forms and will switch to read-only access.
- **September 2nd 2024** – CalCERTS registry will permanently close, eliminating access to existing and past project information.

The CalCERTS notice can be found on the CEC website here:

CHEERS is currently working with builders, HERS raters, energy consultants and others to transition active projects to the CHEERS registry.

Now through September 2nd - Building department officials should work with, and provide flexibility to, HERS Raters, contractors, and builders to ensure the project has either been completed in CalCERTS or has been successfully transferred to CHEERS.

After September 2nd - All projects will be verified through the CHEERS registry.

We appreciate your patience and understanding during this transition. Do not hesitate to reach out to the CHEERS team at help@cheers.org.
